EDUCATION

Annasaheb Chudaman Patil College Of Engineering BE(8th Sem) (SGPI: 8.05 / 10) BE(7th Sem) (SGPI: 8.00 / 10) TE(6th Sem) (SGPI: 6.73/10) TE(5th Sem) (SGPI: 6.74/10) DSE(4th Sem) (SGPI: 6.13/10) DSE(3th Sem) (SGPI: 6.87/10)	November 2022- May 2025
Institute Of Petrochemical Engineering Third year (GPA: 8.45 / 10) Second year (GPA: 9.63 / 10) First year (GPA: 7.77 / 10)	August 2019- July 2022
S.m.g English School 10th (Score: 64.70%)	March 2019

EXPERIENCE

JSW Steel Limited IT Engineer Intern Dolvi, Pen Optimized Smart Grid - Developed a comprehensive strategy to maximize sustainability by integrating clean and renewable energy sources into the smart grid. - Analyzed current energy consumption patterns to identify opportunities for increasing efficiency across the grid infrastructure. - Implemented advanced forecasting techniques to predict energy demand and optimize supply chain management. - Developed predictive models to anticipate fluctuations in energy supply and demand, ensuring continuous power availability.	January 2025
--	---------------------

PROJECTS

Inventory Optimization and Supply Chain Management Technologies: React.js, Python, Solidity, Xampp, php, MySQL, Streamlit, Ganache, Truffle Domain: Machine Learning, Blockchain, Web Application - Developed an inventory optimization model with forecasting techniques to predict demand, adjust inventory, and maintain optimal stock levels year-round. - Enhanced operational efficiency by optimizing reorder levels, streamlining procurement, and establishing strategic vendor partnerships. - Designed a user-friendly dashboard for real-time inventory tracking and KPI monitoring.	Road Lane Detection Technologies: Python, OpenCV, MoviePy Domain: Machine Learning - Developed a Python 3 lane detection pipeline using OpenCV, NumPy, and Matplotlib to process images and videos in a Kaggle environment. - Integrated MoviePy for video handling and a slope-based algorithm for lane line extrapolation, enhancing visualization and modularity. - Designed an efficient, interpretable solution for autonomous driving, with potential for improved adaptability to varied conditions.
Water Taxi Technologies: Python, Scikit-learn Domain: Machine Learning - Modelled operational scenarios to optimize route efficiency and passenger capacity. - Developed scheduling algorithms to enhance fleet utilization and reduce wait times. - Ensured efficient operations by aligning route planning with passenger demand patterns.	Animal Adoption Website Technologies: HTML, CSS, Javascript, php, Xampp Domain: Web Development - Developed an admin dashboard for shelters to efficiently handle pet listings and adoption processes. - Built a robust database for managing pet profiles, user accounts, and adoption applications. - Designed a responsive, user-friendly interface for an animal adoption website with features like an engaging homepage and interactive pet search.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript
Frameworks and Tools: React.js, Node.js., Xampp, AWS Streamlit, Bootstrap, Scikit-learn
Concepts: Machine Learning, Data Analytics

COMPETITION

- | | |
|---|---------------|
| • Aavishkar Intercollegiate Research Convention(University Of Mumbai, Mumbai) | December 2023 |
| • Employability Skill Under Lifeskills(Annasaheb Chudaman Patil College Of Engineering, Kharghar) | August 2023 |
| • Electrowiz(Datta Meghe, Airoli) | March 2025 |
| • Tech Aspiria(Pillai HOC, Rasayani) | March 2025 |

COURSE

- | | |
|---|------------------------|
| • Python For Data Science And Machine Learning Bootcamp | January 2025 - Present |
| • The Complete 2024 Web Development Bootcamp | December 2024- Present |
