

Kartik Patil

Thane, India | +91 9326852383 | patilkartik890@gmail.com | [linkedin.com/in/kartik-p-428534203](https://www.linkedin.com/in/kartik-p-428534203) | github.com/Cygnys

Technical Skills Languages:

- Python, JavaScript, Java, Solidity
- Frontend: React.js, Bootstrap
- Backend & Database: XAMPP (PHP), MySQL, Spring Boot
- Blockchain: Ethereum Smart Contracts, Ganache, Truffle
- ML & Data: Scikit-learn, Streamlit
- Concepts: REST APIs, CRUD Operations, Client–Server Architecture, Inventory Optimization, Blockchain Traceability

Profile Summary

Information Technology graduate with hands-on experience in AI-driven supply chain and inventory optimization systems. Skilled in Python, Java, JavaScript, and Solidity, with practical full-stack development experience using React, PHP, MySQL, and XAMPP. Experienced in machine learning–based demand forecasting, REST APIs, CRUD operations, and blockchain traceability using Ethereum smart contracts. Strong ability to build data-driven dashboards, scalable client–server applications, and real-world problem-solving solutions.

TRAINING & CERTIFICATIONS

- Junior Full Stack Java Developer Program**
- Tata Strive – Generation India Oct 2025 - Present
- Enrolled in a 16-week immersive training program focused on Java, web development fundamentals, and full-stack concepts.
 - Building professional skills including communication, teamwork, attention to detail, and a growth mindset required for workplace success.

Experience

JSW Steel Limited | IT Intern | Optimized Smart Grid

- Developed a comprehensive strategy to maximize sustainability by integrating clean and renewable energy sources into the smart grid.
- Analysed current energy consumption patterns to identify opportunities for increasing efficiency across the grid infrastructure.
- Implemented advanced forecasting techniques to predict energy demand and optimize supply chain management.
- Developed predictive models to anticipate fluctuations in energy supply and demand, ensuring continuous power availability.

Projects

Inventory Optimization and Supply Chain Management

Technologies: React.js, Python, Solidity, Xampp, php, MySQL, Streamlit, Ganache, Truffle

- Developed an inventory optimization model with forecasting techniques to predict demand, adjust inventory, and maintain optimal stock levels year-round.
- Enhanced operational efficiency by optimizing reorder levels, streamlining procurement, and establishing strategic vendor partnerships.
- Designed a user-friendly dashboard for real-time inventory tracking and KPI monitoring.

Animal Adoption Website

Technologies: HTML, CSS, JavaScript, php, Xampp

- Developed an admin dashboard for managing pet listings and adoption workflows.
- Implemented database-backed handling of users, pets, and adoption requests.
- Designed a responsive and user-friendly interface.

Education

A.C.Patil College of Engineering	Navi Mumbai, Maharashtra
Bachelors in engineering (Information Technology)	7.06
Institute of Petrochemical Engineering	Lonere, Mangaon, Maharashtra
Diploma in Information Technology	8.45
